

## JLG Forklift Parts

JLG Forklift Parts - After retiring in the late 1960's, John L. Grove embarked on a cross country RV trip. After spending many years establishing his family built crane business with his brother, John had no idea that this trip would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road expedition.

While on their trip, John spent time talking to previous business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John uncovered an infinite marketplace for a product that could quickly and safely lift individuals in the air to accomplish maintenance and other building services.

Following their return from holiday, John set up a business with two of his friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty workers, they produced and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design essentials of that original lift into current designs.

JLG lift trucks have come a ways since Mr. John L. Grove came back to town from his cross-country road trip and since the initial aerial work platform debuted on the market. These days, the company proudly continues to expand itself into a range of marketplaces worldwide and develops new products to make sure consumers are capable of being more efficient and perform in the workplace within a safer environment.
